TO: Interested Parties including Bidding Contractors
PROJECT: **Parking Lot and Apron Rehabilitation**: Santa Maria Public Airport
SUBJECT: Bid / Project Status
FROM: John A. Smith, Tartaglia Engineering

During a recent meeting at the Santa Maria Public Airport the decision was made to REJECT ALL BIDS received for the Parking Lot and Apron Rehabilitation Project. The timing of this effort has proved to be challenging in weather, time of year, and in coordination with other activities at the airport. Additionally, the possibility for some changes in scope of work have materialized. It is the intention of the Airport District to re-package and re-bid the work in early spring, 2026.

On behalf of the Santa Maria Public Airport District, thank you for your interest in the project and in your continuing interest in providing service to the Airport.

John A. Smith
